Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species 1 in the reply filed on July 14, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 3-6, 9-13 and 15-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 14, 2006.

Claim Objections

3. Claim 2 is objected to because of the following informalities: it appears the words -- which is-- should be inserted in line 2 after the words "comprises a partition". Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 7, 8 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by US 720,902 to Brau.

Brau shows a liquid supplying cartridge as seen in Figs. 1 and 2, having a casing A, a partition member F movable fit in the casing and defining a first chamber above the partition and

Art Unit: 3754

a second chamber below the partition, an outlet port c connectable to external devices, see column 1, lines 43-47, a pressure unit G applying pressure to the partition to press an flexible envelope E connected to the partition. With respect to the cartridge housing a fuel as claimed in claim 7, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bau shows a dispenser with flow restriction valve. Allen shows a safety fuel system. White shows a method for expelling liquid propellant from a storage tank in a liquid rocket. Gross et al. shows an electrochemical driven metering dispenser.
